## **Buy American Act**

### **Buy American Act**

The Buy American Act requires the U.S. Government (and in certain situations state governments) to prefer U.S. made products in its purchases. Pursuant to this Act, a manufactured good used as construction material in a project funded by the federal government requires that a product be manufactured in the United States be more than 65% U.S. fabricated, assembled, materials, components and parts to be considered “Made in the U.S.” for government procurement purposes (60% component cost requirement).

*More information on this topic may be found by reviewing the “Buy America” Act at 41 U.S.C. §§ 10a-10c, and the Federal Acquisition Regulations at 48 C.F.R. Part 25, and the Trade Agreements Act at 19 U.S.C. §§ 2501-2582.*
