Gratitude, Growth, and Gearing Up for the Finish Line.

November 17, 2025

Dear iAIRE Distributors,

As the holidays approach, I want to take a moment to thank all of our distributor partners who make iAIRE's success possible. Together, we've built momentum that's carried us through a strong 2025 — and we're not done yet.

This time of year is all about giving — and what better gift to offer your customers than **clean air, lower energy bills, and dependable comfort that lasts well beyond the holidays?**

At iAIRE, our **complete ecosystem of energy-saving HVAC systems** makes that possible:

-  **Solar HVAC** – Tax-credit-eligible through 2035, cutting compressor energy by up to 50%.
-  **Dedicated Outdoor Air Systems (DOAS)** – The perfect balance of ventilation and efficiency.
-  **Energy Recovery Ventilators (ERVs)** – Capture waste energy and deliver fresh, filtered air.
-  **Ionization Devices** – Healthier indoor spaces that are easy to upsell.

Now is the moment to help your customers **close out the year with comfort, sustainability, and savings**—and for you to wrap up 2025 stronger than ever.

44 Days Remaining in 2025!

From all of us at iAIRE, thank you for being part of this mission to make buildings cleaner, greener, and smarter.

Warm regards,

Chuck Eno

Executive Vice President

Product Spotlight: Dedicated Outdoor Air Systems (DOAS)

Delivering Fresh Air, Efficiently.

For many buildings, indoor air quality and energy efficiency seem like a trade-off. With iAIRE's **Dedicated Outdoor Air Systems**, your customers get both.

Our DOAS units are designed to **precondition and dehumidify outside air**, easing the load on primary cooling systems and improving overall system performance. The result?

- Lower energy consumption
- Better control of humidity and indoor comfort
- Cleaner, fresher air that enhances occupant health and satisfaction

Pair DOAS with our **ultraPURE Ionization** and **ERV systems** to create a complete, high-efficiency indoor air solution that delivers comfort year-round.

 *This season, give your customers the comfort they deserve—and the efficiency they'll thank you for next year.*
