Holiday Cheer, Clean Air, and Year-End Wins with iAIRE!

December 9, 2025

Dear iAIRE Distributors,

As we enter the final month of the year, I want to take a moment to recognize the incredible work our distributor partners have done throughout 2025. Together, we've delivered cleaner air, smarter efficiency, and more sustainable HVAC solutions to customers across the country.

Now, with **22 days left in 2025**, we have one last opportunity to finish strong. This is the season of closing projects, using remaining budgets, and helping customers take advantage of energy-saving solutions that will benefit them well into 2026 and beyond.

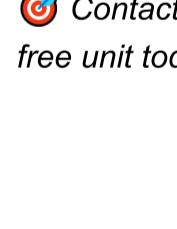

At iAIRE, we continue to offer a **complete ecosystem of high-efficiency HVAC solutions**, including:

-  **Solar HVAC** — Up to 50% energy savings & ITC-eligible through 2035
-  **DOAS Units** — Fresh, clean, conditioned outside air
-  **ERVs** — Energy recovery for maximum efficiency
-  **Ionization Devices** — Cleaner, healthier indoor air

These aren't just products—they provide long-term benefits for your customers: lower operating costs, cleaner environments, and improved comfort all year long.

As we close out 2025, let's keep the momentum going and finish this year with confidence, purpose, and clarity.

Warm regards,

Chuck Eno

Product Spotlight: Energy Recovery Ventilators (ERVs)

Energy Efficiency Meets Indoor Air Quality

This month, our highlighted product is the **iAIRE Energy Recovery Ventilator**, the third feature in our year-end product series.

iAIRE's ERVs help buildings reduce energy waste by capturing and transferring heat and moisture between incoming and outgoing air streams. This improves comfort, lowers operational costs, and enhances indoor air quality without additional equipment load.

Key benefits your customers will appreciate:

- Up to **70% recovery efficiency**
- Lower heating and cooling demands
- Improved humidity control
- Cleaner, fresher incoming air
- Seamless pairing with DOAS and Solar HVAC systems

When bundled with Solar HVAC or DOAS units, ERVs complete the trio of **clean, efficient, sustainable air solutions**—a compelling message to any customer finalizing projects before year-end.

Help your customers wrap up 2025 with comfort and efficiency that keeps giving back for years.
